

Assignment:

Research and Implementation of Unique HTML Tags

Objective

The purpose of this assignment is to help you explore lesser-known and unique HTML5 tags that are not commonly used in regular classroom practice.

Selected HTML5 Tags and Explanation

1. <details> & <summary>

Purpose: Create a collapsible section with a clickable heading.

Use: Hide extra content until the user clicks.

code:

```
<!-- 1. details & summary tag -->
<div class="div1">
  <h2>1. Collapsible FAQ Section</h2>
  <details>
    <summary>What is HTML5?</summary>
    <p>HTML5 is the latest version of HTML that adds new semantic tags and interactive features for
modern web pages.</p>
  </details>
</div>
```

Output:

1. Collapsible FAQ Section

▼ What is HTML5?

HTML5 is the latest version of HTML that adds new semantic tags and interactive features for modern web pages.

2. <mark>

Purpose: Highlights important text.

Use: Emphasize key words or search results.

code:

```
<!-- 2. mark tag -->
<div class="div2">
  <h2>2. Highlight Important Text</h2>
  <p>When searching for terms, <mark>HTML5 semantic tags</mark> help developers structure content better.</p>
</div>
```

Output:

2. Highlight Important Text

When searching for terms, **HTML5 semantic tags** help developers structure content better.

3. <progress>

Purpose: Shows the progress of a task visually.

Use: File uploads, form completion, download progress.

code:

```
<!-- 3. progress tag -->
<div class="div3">
  <h2>3. File Upload Progress</h2>
  <p>Upload Progress:</p>
  <progress value="95" max="100"></progress>
</div>
```

Output:

3. File Upload Progress

Upload Progress:

4. <meter>

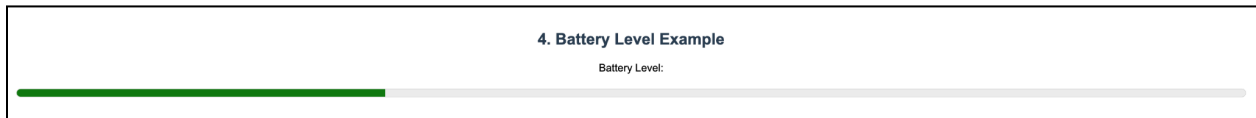

Purpose: Shows a value within a known range.

Use: Battery levels, disk usage, quiz scores.

code:

```
<!-- 4. meter tag -->
<div class="div4">
  <h2>4. Battery Level Example</h2>
  <p>Battery Level:</p>
  <meter value="0.3" min="0" max="1">30%</meter>
</div>
```

Output :

5. <time>

Purpose: Represents a date or time in a machine-readable format.

Use: Blog post dates, event schedules, deadlines.

Example:

```
<!-- 5. time tag -->
<div class="div5">
  <h2>5. Date Example</h2>
  <p>Published on <time datetime="2026-02-16">February 16, 2026</time></p>
  <p>Event starts at <time datetime="2026-02-16T14:00">2:00 PM, Feb 16</time>
</p></div>
```

Output :

The output shows a heading "5. Date Example". Below the heading, there are two lines of text: "Published on February 16, 2026" and "Event starts at 2:00 PM, Feb 16".
